(20) RichEditThemed

Themed RichEdit Class Helper for Visual C++
Created by Patchou, originally for Messenger Plus!
RichEditThemed.h - Last Revision: January 7th 2006
Purpose: adds Windows XP theme support to Rich Edit controls

This library is free as in NOT under GPL license. You can use it in any program, in the binary form of your choice, and without being asked to add unnecessary files to your redistribution package. Free source should neither be restrained by a 6 page license nor should it force you to share the source of any part of a program you do not wish to share. The meaning of the word freedom is the same for everyone, no license should have the pretension of redefining it. If you want to share some source code, please use a similar copyright notice, your peers will be grateful.

Free redistribution and usage of the content of this file is permitted as long as the above statement is kept, unchanged, at its original location.
