Included Software Catalog

This release includes Software Catalog version 10.0.13.2 with capability to discover 900+ new software versions including but not limited to the following software manufacturers: Cisco, Citrix, Google, Microsoft, Oracle, RED HAT, SAP and VMware.

New template signatures included in this release:
Template signature is a method of discovery where the version of a component is detected automatically, and a specific version is dynamically added to the catalog. Such template signatures include all component versions. They are used when the software is frequently updated, and the deployment method has not changed. One template covers 10+ software versions.

Changes made to the software component definition in catalog (e.g., modification of component name, version, or publisher) may cause creation of new definition of the component and removal of previous one. This leads to loss of Tagging, Classification and custom EOS information.
Additionally, when discovery is based on a signature evaluated on an endpoint, previous discovery results temporarily disappear until the next software scan and related data import. New catalog must be propagated to the endpoints before the scan execution.

Updated discovery mechanism for specific software with this behaviour includes specific notes (for details and impacted software title refer to the list of enhancements, ideas implemented and list of defects).

Enhancements and important changes

The following table lists enhancements and changes that are introduced in this update.

Abstract	Description	Available since
Added discovery for Oracle Java	Added discovery for Oracle Java Version 20. Discovery is added for WINDOWS and UNIX Platforms	10.0.13.2
Added discovery for 'Microsoft Office Home and Business 2019'	Added discovery for 'Microsoft Office Home and Business 2019' and their classic versions of Microsoft Word, OneNote, Excel, PowerPoint and Outlook	10.0.13.2
Added discovery for 'Microsoft Office Home and Business 2021'	Added discovery for 'Microsoft Office Home and Business 2021' and their classic versions of Microsoft Word, OneNote, Excel, PowerPoint and Outlook	10.0.13.2
Dynamic discovery for WinDirStat with new template signature	Replaced discovery method with template signature to improve the current discovery, also expected to handle future versions for the following component: WinDirStat *Old discovery records will be closed, and new ones will be opened.*	10.0.13.2
Added new publishers	Added 12 new publishers: - SentryBay - Janusz Szpilewski - MindFusion - QGate - NV Access - Zuken - Endian - PLS Programmierbare Logik & Systeme 508 Software - Bernhard Seifert - Nordea - Auwau	10.0.13.2

Publisher normalization

Starting from BigFix Inventory 10.0.13.2, Publisher data is improved with simplified data filtering and reporting. This is a continuous process, and the next changes will be provided in future catalog updates. The changes include updating existing publisher names to current ones, and deduplicating publishers as well as covering acquisitions.

In case a publisher does not exist anymore, and it was used in catalog customization then it remains in the catalog report.

The change also means that only the publisher in the second column remains. Thus, existing custom reports may require adjustment to use current Publisher information.

Ideas Implemented

The following table lists BigFix Inventory Catalog Ideas that are implemented in this update.

ID	Idea	Description	Available since
BFINV-I-288	Add Discovery of Cloutility from Auwau	Added discovery for Cloutility for version 1.0. Discovery is added for Windows Platform	10.0.13.2
BFINV-I-253	Add Discovery of Microsoft System Center Operations Manager for UNIX/Linux agent	Added discovery for Microsoft System Center Operations Manager Agent for versions 1.6, 1.7 for UNIX Platform. Deleted faulty signature of Microsoft System Center Operations Manager Console for version 2016. Added new signatures for Microsoft System Center Operations Manager Console for versions 2016, 2019, 2022 for Windows Platform. To maintain the consistent in Component version. Replaced the existing signatures of Microsoft Monitoring Agent for versions 2016, 2019, 2020, 2022 for Windows Platform. ✏️*Old discovery records will be closed, and new ones will be opened.*	10.0.13.2
BFINV-I-229	Add discovery of Veritas Netbackup in Unix platform	Added discovery of Veritas Netbackup for versions 10.1,10.2 for Unix Platform	10.0.13.2
