

BigFix Inventory 10.0.6.1 Release Notes

This document provides information about the BigFix Inventory application update 10.0.6.1. The update is cumulative and contains changes that were provided in the previous updates.

Name of the component	Version	Updated in this Release
BigFix Inventory Content Site	147	Yes
BigFix Inventory Software Catalog (main version)	10.0.6.1	Yes
BigFix Inventory Software Catalog (version on endpoint)	2638663	Yes
BigFix Inventory Server	10.0.6.0	No
BigFix Inventory Server: ILMT Core library	9.2.24.0	No
BigFix Inventory Server: ILMT Catalog	9.2.24.0	No
BigFix Inventory Scanner	<u>9.2.24.1000 (Windows)</u>	No
	<u>9.2.24.0000 (other platforms)</u>	No
BigFix Inventory Disconnected Scanner	10.0.6.0	No
	9.2.24.0 (for IBM I)	
BigFix Inventory VM Manager Tool	10.0.6.0	No
SAP Metric Data Collector	10.0.6.0	No

Included Software Catalog

New discovery capabilities for:

- Adobe
- BMC
- CA Technologies
- Cisco Systems Inc
- Citrix
- Dell Computer Corporation
- Hewlett-Packard
- Intel
- Microsoft
- Oracle
- Red Hat

And many others

- Several defects fixed.
- This release includes Software Catalog version 10.0.6.1 with capability to discover more than 320 new software versions.

Defect fixes

For the list of known defects please refer to [HCL Knowledge Base](#).

The following table lists APARs and other defects that are fixed in this update.

ID	Symptoms	Behavior after you install the update	Available since
Catalog Updates			

BI-6247	Discovery for Microsoft Visio Professional and Standard 2019 were based on package. After the Visio update package name was changed and discovery didn't work properly.	Signatures were updated to use Visio configuration data.	10.0.6.1
BI-6838	There were two Sophos Endpoint Defense signatures in the catalog that should be under Sophos Endpoint component and not under Sophos Endpoint Defense.	Now there is no signature with the name of the Sophos Endpoint Defence component.	10.0.6.1
BI-7293	Discovery of SAS Data Integration Studio was based on checking if distudio.exe file exists. Problem occurs when new update is installed, and software manufacture is not updating installation path.	Discovery is based on different file which contains proper version of SAS Data Integration Studio.	10.0.6.1
KB0094183	TOAD for Oracle catalog mismatches caused by template signature taking version from the package instead of the executable	Discovery was fixed by taking version from the executable instead of the package. Also, some components were deleted to improve detection provided by the template component.	10.0.6.1
BI-7812	Detection of the BMC Control-M Server 9.0 was based on the folder name which can be changed and lead to false positives or lack of detection.	Now discovery is based on installed-versions.txt file which contains version information.	10.0.6.1
BI-6415	Too wide operating system designation in two signatures caused warnings in Common Inventory Toolkit logs on some BigFix endpoints.	Operating system designation in signatures were corrected.	10.0.6.1
KB0094212	HP Insight Diagnostics Online Edition for Windows discovery was based on a certain registry key that was found in different software on customer environment causing false discovery	HP Insight Diagnostics Online Edition for Windows and HP Insight Diagnostics discovery was improved.	10.0.6.1

Documentation
