

BigFix Inventory Catalog 20240612 Release Notes

BigFix Inventory server version 11.0.0.0 is required to update the software catalog.

See server release notes for details: <https://support.bigfix.com/bfi/BigFix-Inventory-11.0.0.0-ReleaseNotes.pdf>

This table provides information about the BigFix Inventory software catalog update 20240612. The update is cumulative and contains changes that were provided in the previous updates.

Name of the component	Version	Updated in this Release
BigFix Inventory Discovery Site	2	Yes
BigFix Inventory Server Software Catalog	20240612	Yes
BigFix Inventory Scanner Software Catalog - Major	2638889	Yes

IMPORTANT: Changes related to the catalog update process

Starting from this release, Catalog updates are available from a new BigFix Inventory Discovery site, and BigFix Inventory server version 11.x is required for this and all subsequent catalog releases.

Starting with BigFix Inventory version 10.0.13, the BigFix Inventory Team initiated catalog-related improvements to be ready for more frequent and server independent updates.

All changes up to version 10.0.16 are summarized in a dedicated BigFix [forum post](#).

This release brings new important changes

- Reduced catalog package size due to the complete removal of backward compatible files
- Refinement of main catalog content for streamlined processing and removal of orphan records
- Integration of new definitions to reduce noise and enhance out-of-the-box discovery capabilities.
- New format of changelist that includes additions, removals and modifications, the first changelist includes all changes between 20240306 catalog and this release, and it will grow bigger with each update.

To ensure a seamless transition without disrupting existing BigFix Inventory deployments there is change to the distribution method and compatibility definitions of the catalog.

Upgrading the BigFix Inventory server to version 11 is required to activate the catalog import option. Previous versions of BigFix Inventory server will ignore new catalogs during import time.

Contact support if specific discovery gaps are noticed in reports before and after catalog updates.

Included Software Catalog

This release includes Software Catalog with capability to discover 250+ new software versions including but not limited to the following software manufacturers: Adobe, Micro Focus, Microsoft, Oracle & VMware.

New template signatures included in this release:

Template signature is a method of discovery where the version of a component is detected automatically, and a specific version is dynamically added to the catalog. Such template signatures include all component versions. They are used when the software is frequently updated, and the deployment method has not changed. One template covers 10+ software versions.

Publisher Name	Component Name	Platform
The Document Foundation	LibreOffice	UNIX
Dominik Reichl	KeePass Password Safe	WINDOWS
MicroFocus	Serena Changeman Merge Tool	WINDOWS
Axon Enterprise Inc.	Axon Evidence Upload XT	WINDOWS
Dynatrace	Dynatrace OneAgent for Windows	WINDOWS
Sober Lemur	PDFsam Basic	WINDOWS
Gallagher & Robertson	Glink Enterprise Edition	WINDOWS
VanDyke Software	SecureFX	WINDOWS
Mythicsoft	Agent Ransack	WINDOWS
VanDyke Software	SecureCRT	WINDOWS
Thales	SafeNet Authentication Client	WINDOWS
Open Text	RightFax FaxUtil	WINDOWS

 Changes made to the software component definition in catalog (e.g., modification of component name, version, or publisher) may cause creation of new definition of the component and removal of previous one. This leads to loss of Tagging, Classification and custom EOS information.

Additionally, when discovery is based on a signature evaluated on an endpoint, previous discovery results temporarily disappear until the next software scan and related data import. New catalog must be propagated to the endpoints before the scan execution.

Updated discovery mechanism for specific software with this behavior includes specific notes (for details and impacted software title refer to the list of enhancements, ideas implemented and list of defects).
