

BigFix Inventory Catalog 20250512 Release Notes

BigFix Inventory server version 11.0.0.0 is required to update the software catalog.

See server release notes for details and upgrade procedure:

<https://support.bigfix.com/bfi/BigFix-Inventory-11.0.0.0-ReleaseNotes.pdf>

This table provides information about the BigFix Inventory software catalog update 20250512. The update is cumulative and contains changes that were provided in the previous updates.

Name of the component	Version	Updated in this Release
BigFix Inventory Discovery Site	19	Yes
BigFix Inventory Server Software Catalog	20250512	Yes
BigFix Inventory Scanner Software Catalog - Major	2638943	Yes

If *BigFix Inventory Discovery* site is not visible

1. Check for License Update via BigFix License Overview (refresh if needed)
[License Overview dashboard](#)
2. Enable new sites: *BigFix Inventory* and *BigFix Inventory Discovery*.
[Selecting Sites](#)

IMPORTANT: Changes related to the catalog update process

Starting from 20240612 release, Catalog updates are available from a new BigFix Inventory Discovery site, and BigFix Inventory server version 11.x is required for all subsequent catalog releases.

Upgrading the BigFix Inventory server to version 11 is required to activate the catalog import option. Previous versions of BigFix Inventory server will ignore new catalogs during import time.

License Mapping & Software Categorization through Artificial Intelligence

Now the catalog includes Software product license types & Software component categories details. This data is powered by Artificial Intelligence (AI) and verified in-house for selected vendors to provide accuracy close to 90%.

The BigFix Inventory v11.0.2.0 reports are enhanced with this information to help with license compliance and optimization scenarios.

For more information, refer to user documentation:

https://help.hcl-software.com/bigfix/11.0/inventory/Inventory/Discovery/license_types_software_category.html

and BigFix Inventory 11.0.2.0 release notes:

Software Catalog

This release includes Software Catalog with capability to discover 130+ new software versions including but not limited to the following software manufacturers like CyberArk, Dell, Microsoft, Oracle & SentinelOne.

New template signatures included in this release:

Template signature is a method of discovery where the version of a component is detected automatically, and a specific version is dynamically added to the catalog. Such template signatures include all component versions. They are used when the software is frequently updated, and the deployment method has not changed. One template covers 10+ software versions.

Publisher Name	Component Name	Platform
Dell	Quest Security Explorer	WINDOWS
Dell	Quest SQL Navigator	WINDOWS
Dell	Quest SQL Optimizer for Oracle	WINDOWS
CyberArk	Replicator	WINDOWS
CyberArk	PrivateArk Client	WINDOWS
CyberArk	Password Vault Web Access	WINDOWS
CyberArk	CyberArk Oracle Instant Client	WINDOWS
CyberArk	CyberArk Privileged Session Manager Infrastructure	UNIX
CyberArk	CyberArk Privileged Session Manager	UNIX
CyberArk	CyberArk Application Identity Manager	UNIX
Quest Software	Safeguard Authentication services	UNIX

 Changes made to the software component definition in catalog (e.g., modification of component name, version, or publisher) may cause creation of new definition of the component and removal of previous one. This leads to loss of Tagging, Classification and custom EOS information.

Additionally, when discovery is based on a signature evaluated on an endpoint, previous discovery results temporarily disappear until the next software scan and related data import. New catalog must be propagated to the endpoints before the scan execution.

Updated discovery mechanism for specific software with this behavior includes specific notes (for details and impacted software title refer to the list of enhancements, ideas implemented and list of defects).

Note: this information relates only to entries enlisted with the icon:

Modified content

The following fixlets were updated and should be run to install the latest versions of the specific components:

- Server Software Catalog Update – version 20250512, 12/05/2025

Enhancements and important changes

The following table lists enhancements and changes that are introduced in this update.

Abstract Story	Description	Available since
Added discovery for Oracle Java	Added discovery for Oracle Java version 23 & 24. Discovery is added for both WINDOWS & UNIX platforms.	20250512
Added discovery for Quest Security Explorer	Added a new template based signature for Quest Security Explorer. Discovery is added for WINDOWS platform.	20250512
Added discovery for Quest SQL Navigator	Added a new template based signature for Quest SQL Navigator. Discovery is added for WINDOWS platform.	20250512
Added discovery for Quest SQL Optimizer for Oracle	Added a new template based signature for Quest SQL Optimizer for Oracle. Discovery is added for WINDOWS platform.	20250512
Updated the existing signatures of Oracle Instant Client	Updated the existing signatures of Oracle Instant Client for versions 10.1, 10.2, 12.1, 12.2, 18.3, 18.4, 18.5, 19.3, 19.5, 19.6, 19.8, 19.9, 19.10, 19.12, 19.13, 19.14 and 21. Discovery is updated for both WINDOWS & UNIX platforms.	20250512
Added discovery for Safeguard Authentication services	Added a new template based signature for Safeguard Authentication services. Discovery is added for the UNIX platform. Deleted the Unix package rule for versions 4.2 and 5.0 to avoid false discovery.  <i>Old discovery records will be closed, and new ones will be opened.</i>	20250512
Added discovery for Remote File Viewer	Added discovery for Remote File Viewer for version 6.0. Discovery is added for WINDOWS platform	20250512

Added discovery for Remote Heap Walker	Added discovery for Remote Heap Walker for version 6.0. Discovery is added for WINDOWS platform	20250512
Added discovery for Remote Process Viewer	Added discovery for Remote Process Viewer for version 6.0. Discovery is added for WINDOWS platform	20250512
Added discovery for Remote Registry Editor	Added discovery for Remote Registry Editor for versions 5.0 and 6.0. Existing signatures for CE Remote Tools for versions for 6.0 and 5.01 are deleted to avoid false discovery. Discovery is added for WINDOWS platform.	20250512
Added discovery for Remote Spy	Added discovery for Remote Spy for version 6.0. Discovery is added for WINDOWS platform	20250512
Added discovery for Remote Zoom In	Added discovery for Remote Zoom In for version 6.0. Discovery is added for WINDOWS platform	20250512

Ideas Implemented

The following table lists BigFix Inventory Catalog Ideas that are implemented in this update.

ID	Symptoms	Behavior after you install the update	Available since
BFINV-I-345	Updated Discovery for SentinelOne Agent	Updated existing template signature for SentinelOne Agent for UNIX platform. WINDOWS signature GUID's are regenerated.  <i>Old discovery records will be closed, and new ones will be opened.</i>	20250512
BFINV-I-414	Added discovery for CyberArk Components	Added new template based signatures for the following CyberArk Components 1. CyberArk Replicator for WINDOWS platform. 2. CyberArk PrivateArk Client for WINDOWS platform. 3. CyberArk Password Vault Web Access for WINDOWS platform. 4. CyberArk Oracle Instant Client for WINDOWS platform. 5. CyberArk Privileged Session Manager Infrastructure for UNIX platform.	20150512

		<p>6. CyberArk Privileged Session Manager for UNIX platform.</p> <p>7. CyberArk Application Identity Manager for UNIX platform.</p> <p>Deleted the existing signatures of CyberArk Application Identity Manager for versions 9.70 and 11.7 to avoid false positives</p> <p>Updated the existing template signature of CyberArk Application Identity Manager and CyberArk Privileged Session Manager for WINDOWS platform.</p> <p></p> <p><i>Old discovery records will be closed, and new ones will be opened.</i></p>
