

BigFix Inventory Catalog 20260512 Release Notes

This table provides information about the BigFix Inventory software catalog update 20260512. The update is cumulative and contains changes that were provided in the previous updates.

Name of the component	Version	Updated in this Release
BigFix Inventory Discovery Site	41	Yes
BigFix Inventory Server Software Catalog	20260512	Yes
BigFix Inventory Scanner Software Catalog - Major	2638998	Yes

Software Catalog

This release includes Software Catalog with capability to discover 20+ new software versions including but not limited to the following software manufacturers like Adobe, Amazon, Microsoft, & Oracle.

 Changes made to the software component definition in catalog (e.g., modification of component name, version, or publisher) may cause creation of new definition of the component and removal of previous one. This leads to loss of Tagging, Classification and custom EOS information.

Additionally, when discovery is based on a signature evaluated on an endpoint, previous discovery results temporarily disappear until the next software scan and related data import. New catalog must be propagated to the endpoints before the scan execution.

Updated discovery mechanism for specific software with this behavior includes specific notes (for details and impacted software title refer to the list of enhancements, ideas implemented and list of defects).

Note: this information relates only to entries enlisted with the icon:
